

# Join our Connected Feeding Program

You are invited to enroll in nfant's Connected Feeding™ Program, a supportive group of moms navigating their own unique feeding journeys—with a little help from experts.

As part of this program, you'll get access to discounted Thrive products, tech support, and expert-reviewed resources to help you feel more confident—whether you're breastfeeding, bottle feeding or both. You're already doing the most important thing—showing up for your baby. We're here to make it a little easier.

To enroll, scan this QR code or visit [nfant.com/connected-feeding-program](https://nfant.com/connected-feeding-program). Enter the following code where prompted to save on Thrive products:

## Take the guesswork out of feeding™

**Your healthcare provider recommends you consider nfant® Thrive Feeding System**

Feeding your baby, whether by bottle, breast or both, can be unexpectedly challenging. If you find yourself navigating issues like latching difficulties, milk supply concerns or bottle refusal, you are not alone.

Our innovative biofeedback technology gives you real-time insights to questions you may be asking every day: *Is my baby getting enough milk? Is the milk flowing? Is my baby feeding correctly? If not, what should I do?*

You'll get the answers and reassurance you need—so you can feel more confident, and your baby can thrive.

# Trust your instincts – with a little help from us

You know your baby better than anyone, but sometimes it helps to have a little extra insight. The nfant Thrive Feeding System supports your intuition while enhancing your observations with real-time biofeedback data, so you can measure milkflow when breastfeeding, determine if bottle feeding is going well, see how your baby is responding to changes and interventions and more.

## nfant® Thrive Breast

Breastfeeding is a wonderful way to connect with and nourish your baby. But as every mom knows, nursing has its challenges and can leave you wondering if your baby is getting milk at the breast.

nfant® Thrive Breast is a first-of-its-kind product designed to help you better understand when—and how much—milk is flowing. Thrive Breast non-invasively tracks milk flow and sends the information to the nfant® Thrive Tracker App for real-time viewing as well as sharing with pediatricians and lactation consultants.

This product blends seamlessly with your feeding sessions and is calibrated to you and your baby.

nfant® is a leader in infant feeding analytics with over a decade of experience helping families and healthcare professionals improve feeding outcomes based on science and compassion.

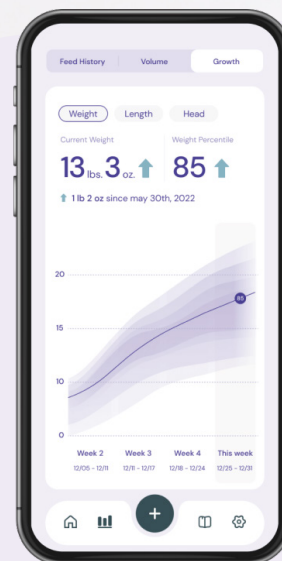

## nfant® Thrive Bottle

*What nipple flow rate best matches by baby's breast feeding preferences? What actions can I take to make combination feeding more successful? How do I know if my baby's feeding skills are on track with his development? How can I resolve my concerns about tongue-tie? Spit-up? Feeding schedules?*

Feeding shouldn't feel like guesswork. Thrive Bottle gives you real-time insights by tracking baby's muscle movements. It helps you understand what's working, what's not and when it's time to adjust, so you can feel more confident that your baby is getting the nourishment they need.

Thrive Bottle includes our line of nfant Control Flow Nipples—color-coded bottle nipples with increasing flow rates to match every baby's feeding stage and style.

## Connected Feeding™ with the nfant® Tracker App

Our free app gives you insight into how your baby feeds, whether you're using the Thrive Breast, Thrive Bottle or both.

- See how your baby feeds in real time
- Track and analyze feeding data
- Spot helpful patterns and trends
- Adjust your routine based on personalized insights
- Share information easily with your care team
- Feel more confident in every feeding moment

Download the nfant tracker app free on the Apple Store or Google Play.
